Research Papers

Basin geomorphological controls on the mechanism of recharge and discharge and its effect on salt storage and mobilization — comparative study using geophysical surveys
R.B. Salama, G. Bartle, P. Farrington and V. Wilson 1

An analysis of solute accumulation during steady-state evaporation in an initially contaminated soil
D.E. Elrick, A. Mermoud and T. Monnier 27

Dynamics of the interface between streams and groundwater systems in lowland areas, with reference to stream net evolution
J.J. de Vries 39

The effects of water availability on transpiration, water potential and growth of *Picea abies* during a growing season
E. Cienciala, A. Lindroth, J. Čermák, J.-E. Hällgren and J. Kučera 57

Isotopic determination of snow-water contribution to soil water and groundwater
C.P. Maulé, D.S. Chanasyk and K. Muehlenbachs 73

A rational routing element for watershed cell models
M.H. Diskin 93

The fault pattern in the northern Negev and southern Coastal Plain of Israel and its hydrogeological implications on groundwater flow in the Judea Group aquifer
G. Weinberger and E. Rosenthal 103

Application of fracture-flow hydrogeology to acid-mine drainage at the Bunker Hill Mine, Kellogg, Idaho
T.E. Lachmar 125

A simple non-linear rainfall–runoff model with a variable gain factor
M. Ahsan and K.M. O'Connor 151

A multiple-input single-output variable gain factor model
G.C. Liang, K.M. O'Connor and R.K. Kachroo 185

Quantitative measurement of ^{222}Rn in water by the activated charcoal passive collector method: 1. The effect of water in a collector
M. Yoneda, Y. Inoue and K. Yoshimoto 199

Bivariate exponential model applied to intensities and durations of extreme rainfall
B. Bacchi, G. Becciu and N.T. Kottegoda 225

Analysis of pumping tests, with regard to tectonics, hydrothermal effects and weathering, for fractured Dalha and stratiform basalts, Republic of Djibouti
M. Jalludin and M. Razack 237

Effect of depth of impervious layer and adsorption on solute transport in tile-drained irrigated lands
S.K. Kamra, S.R. Singh and K.V.G.K. Rao 251

A semi-distributed, variable time interval model of catchment hydrology — structure and parameter estimation procedures
D.A. Hughes and K. Sami 265

Book Reviews

Principles and Applications of Aquatic Chemistry, by F.M.M. Morel and J.G. Hering — J. Wangersky 293

Ecological Rehabilitation of Floodplains, Report 11-6 CHR/KHR, by A. Wagenaar-Hart (Editor) — J.H.J. Terwindt 294
Geochemical, Groundwater and Pollution, by C.A.J. Appelo and D. Postma — W.H. van der Molen 295

Vol. 155 Nos. 3–4 **15 March 1994**

Special Issue: Mesoscale Hydrology and General Circulation Models

Contents vi
Preface vii
Validation of hydrological schemes for climate models against catchment data
P.R. Rowntree and J. Lean 301
The impact of changes in the runoff formulation of a general circulation model on surface and near-surface parameters
P. Viterbo and L. Illari 325
A model of river runoff for use in coupled atmosphere–ocean models
R. Sausen, S. Schubert and L. Dümenil 337
Implementation of the ISBA parametrization scheme for land surface processes in a GCM — an annual cycle experiment
A.O. Manzi and S. Planton 353
The impact of African and Amazonian deforestation on tropical climate
J. Polcher and K. Laval 389
Atmospheric water vapor transport and continental hydrology over the Americas
K.L. Brubaker, D. Entekhabi and P.S. Eagleson 407
Limiting cases of water fluxes at the land surface
Q.J. Wang and J.C.I. Dooge 429
